### RESTRICTION/ELECTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 15-54, drawn to a system and method for detecting skin and eyes in an image, classified in class 382, subclasses 117 and 118.
  - II. Claims 1-15, drawn to a computer-readable media for detecting red-eye, classified in class 348, subclass 223.1+.

Inventions are related as combination/subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because I does not require "combining red pixels together into one or more groups, with adjacent red pixels being combined into same group".

The subcombination has separate utility such as detecting red-eye effect.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the **cancellation of claims to a non-elected invention**, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 2623

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
